01 Executive Summary

The Nigerian residential property market demonstrated steady expansion in June 2026, with active listings growing by 23.0% from 9,864 in the first week to a peak of 12,131 in the final week. Across the 194 unique neighbourhoods analysed, cumulative active listings reached 43,648, supported by 3,752 new listings discovered during the four-week period. This supply surge reflects heightened developer activity and listing onboarding across key metropolitan hubs.

Pricing dynamics remained relatively stable, with the weekly median price starting at ₦15.0M, peaking at ₦17.2M in the third week, and returning to ₦15.0M by the final week. This fluctuation correlates with a temporary pause in new listings during the week of 15 June 2026, which temporarily compressed supply and pushed median prices upward before a fresh influx of 1,361 new listings in the final week restored the baseline.

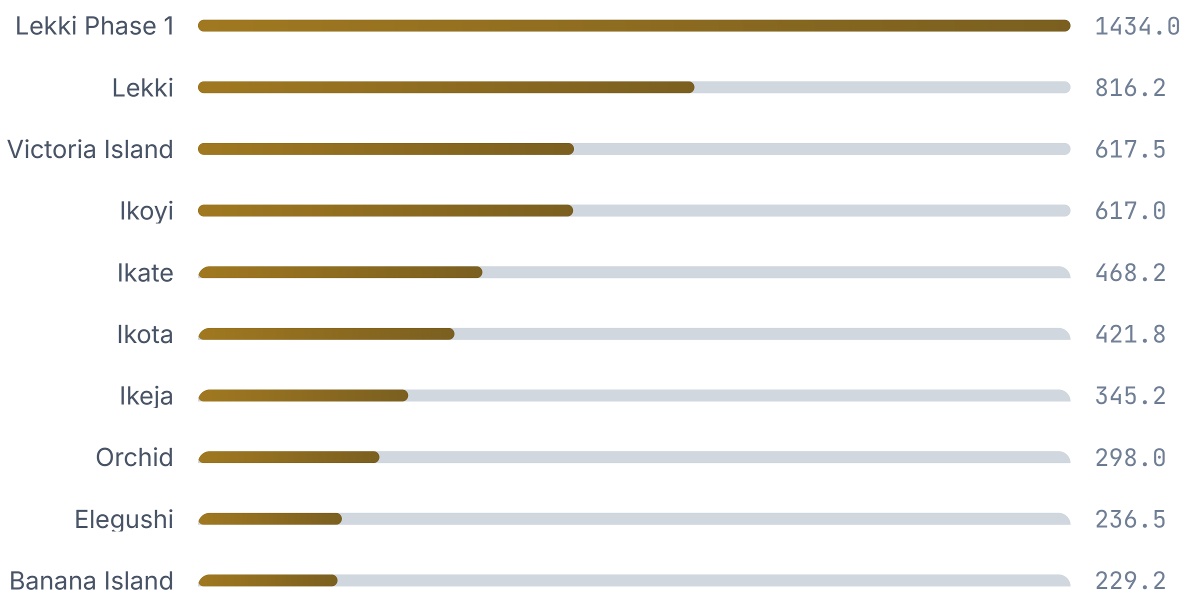
Market liquidity showed variation across regions, with a total of 263 price reduction events recorded, peaking at 78 reductions in the week of 8 June 2026. Lagos continues to dominate market activity, accounting for the vast majority of listings and price adjustments, while secondary markets like Enugu and Port Harcourt posted higher median prices, reflecting niche luxury developments and limited inventory.

Key Takeaways

- Active listings grew by 23.0% over the four-week period, peaking at 12,131 active properties.
- Lagos dominated market activity, accounting for 115 neighbourhoods and 222 of the 263 recorded price reductions.
- Apapa and Pinnock Beach Estate established the luxury ceiling with median prices of ₦1300.0M and ₦1000.0M respectively.
- Abuja maintained a premium profile with a city-wide median price of ₦30.0M across 48 neighbourhoods.
- Enugu and Port Harcourt recorded high median prices of ₦175.0M and ₦120.0M, reflecting low-volume, high-value regional markets.

02 Inventory Distribution — Most Active Markets

Listing volumes are heavily concentrated in Lagos, which contains 115 of the 194 analysed neighbourhoods. The weekly active inventory expanded steadily from 9,864 to 12,131, indicating a healthy pipeline of residential stock. The sudden drop in new listings to zero during the week of 15 June 2026 represents a brief administrative or operational pause, but the immediate recovery to 1,361 new listings in the subsequent week underscores the market's underlying momentum. The distribution of active listings is highly skewed toward premium coastal corridors. Lekki Phase 1 leads national activity with an average of 1434.0 active listings per week, followed by Lekki at 816.2, Victoria Island at 617.5, and Ikoyi at 617.0. This concentration signals that developer capital remains heavily focused on the high-density, high-value Lagos Island axis, where investor demand is most liquid.



#	NEIGHBOURHOOD	CITY / STATE	AVG. WEEKLY ACTIVE LISTINGS
1	Lekki Phase 1	LAGOS	1,434.0
2	Lekki	LAGOS	816.2
3	Victoria Island	LAGOS	617.5
4	Ikoyi	LAGOS	617.0
5	Ikate	LAGOS	468.2
6	Ikota	LAGOS	421.8
7	Ikeja	LAGOS	345.2
8	Orchid	LAGOS	298.0
9	Elegushi	LAGOS	236.5
10	Banana Island	LAGOS	229.2

Average computed across all snapshot weeks in the reporting period. Neighbourhoods with fewer than 10 average weekly listings are excluded from pricing tables.

03 Pricing Tiers — Expensive & Affordable

The pricing landscape reveals a stark divide between premium luxury enclaves and highly affordable micro-units. At the luxury ceiling, Apapa leads with an average median price of ₦1300.0M and a days on market (DOM) of 44.0 days, followed closely by Pinnock Beach Estate at ₦1000.0M (DOM: 41.5 days) and Omole Phase 2 at ₦650.0M (DOM: 35.2 days). These figures demonstrate sustained capital appreciation and investor appetite for premium residential assets in secure estates. Conversely, the affordable end of the market is characterised by micro-units, short-lets, or rental listings, exemplified by Eko Atlantic at ₦448k (DOM: 40.8 days) and Wuse at ₦656k (DOM: 32.5 days). Traditional affordable residential sales are represented by areas like Mushin at ₦1,000k and Onipanu at ₦1,200k. The low DOM for high-end estates like Royal Garden Estate (16.9 days at ₦485.0M) indicates that well-priced premium stock is absorbed rapidly.

Most Expensive Areas

#	NEIGHBOURHOOD	AVG. MEDIAN PRICE	AVG. DOM
1	Apapa LAGOS	₦1.30B	44.0d
2	Pinnock Beach Estate LAGOS	₦1000.0M	41.5d
3	Omole Phase 2 LAGOS	₦650.0M	35.2d
4	Omole Phase 1 LAGOS	₦488.5M	38.0d
5	Royal Garden Estate LAGOS	₦485.0M	16.9d
6	Nicon Town LAGOS	₦373.8M	37.5d
7	Amuwo Odofin LAGOS	₦286.2M	20.8d
8	Guzape ABUJA	₦270.0M	32.3d
9	Ojodu Berger LAGOS	₦268.8M	39.5d
10	Kado ABUJA	₦241.2M	34.2d

Most Affordable Areas

#	NEIGHBOURHOOD	AVG. MEDIAN PRICE	AVG. DOM
1	Eko Atlantic LAGOS	₦448k	40.8d
2	Wuse ABUJA	₦656k	32.5d
3	Mushin LAGOS	₦1.0M	33.1d
4	Onipanu LAGOS	₦1.2M	39.2d
5	Ilupeju LAGOS	₦1.2M	41.2d
6	Kosofe LAGOS	₦1.6M	38.1d
7	Badore LAGOS	₦1.8M	28.2d
8	Seaside Estate LAGOS	₦1.8M	18.9d
9	Lagos Business School LAGOS	₦2.0M	40.8d
10	Shomolu LAGOS	₦2.0M	30.8d

04 Regional Deep Dive

Lagos

Lagos remains the undisputed anchor of the Nigerian residential market, commanding 115 neighbourhoods and a median price of ₦15.0M. The market is characterised by intense activity in Lekki Phase 1, which averaged 1434.0 active listings per week, and extreme pricing diversity, ranging from the ₦1300.0M luxury benchmark in Apapa to entry-level pricing in Mushin at ₦1,000k. The state also recorded 222 of the country's 263 price reduction events, indicating that while demand is robust, sellers must actively adjust expectations to secure transactions in a highly competitive environment.

NEIGHBOURHOODS	TOP AREA	MEDIAN PRICE
115	Lekki Phase 1	₦15.0M

Abuja (FCT)

Abuja's residential market, spanning 48 neighbourhoods, presents a premium profile with a city-wide median price of ₦30.0M, double that of Lagos. High-end demand is concentrated in Guzape and Kado, which posted average median prices of ₦270.0M (DOM: 32.3 days) and ₦241.2M (DOM: 34.2 days) respectively, with Katampe emerging as the top area. The capital city recorded 29 price reduction events, reflecting a relatively stable pricing environment where developers face less pressure to discount compared to their Lagos counterparts.

NEIGHBOURHOODS	TOP AREA	MEDIAN PRICE
48	Katampe	₦30.0M

Other Cities (Ibadan, Enugu, Port Harcourt, Edo, Ogun, Imo)

Outside the two primary metropolitan hubs, Enugu and Port Harcourt stand out with remarkably high median prices of ₦175.0M and ₦120.0M respectively, driven by low inventory and highly concentrated luxury pockets. Edo, with 5 neighbourhoods and Asaba listed as its top area, recorded a median price of ₦72.5M, while Ibadan (5 neighbourhoods, median ₦20.0M) and Ogun (15 neighbourhoods, median ₦7.4M) offer more accessible entry points for regional investors. Imo represents the most affordable regional market analysed, with 3 neighbourhoods and a median price of ₦4.6M in Owerri.

05 Weekly Inflow & Price Reduction Trends

WEEK START	ACTIVE LISTINGS	NEW LISTINGS	PRICE REDUCTIONS	MEDIAN PRICE (NGN)
2026-06-01	9,864	1,268	54	₦15.0M
2026-06-08	10,881	1,123	78	₦17.0M
2026-06-15	10,772	0	71	₦17.2M
2026-06-22	12,131	1,361	60	₦15.0M

06 Price Reduction Analysis — Seller Behaviour

The 263 price reduction events recorded in June 2026 serve as a critical barometer for market sentiment and pricing accuracy. Lagos accounted for 84.4% of these adjustments (222 events), peaking nationally during the week of 8 June 2026 with 78 reductions. This volume of price corrections suggests that initial asking prices in highly competitive segments, particularly along the Lekki-Ajah corridor, are frequently being recalibrated downward to meet actual buyer liquidity, highlighting a transition toward a buyer-led market in specific sub-sectors.

Peak reduction week: 2026-06-08 with 78 events.

07 Market Outlook

Looking ahead, the 23.0% expansion in active listings over the four-week period suggests that supply will continue to outpace demand in the near term, likely keeping median prices anchored around the ₦15.0M to ₦17.0M range. Developers in Lagos will need to focus on realistic pricing strategies, as evidenced by the high volume of price reductions required to close deals. Meanwhile, secondary markets like Enugu and Port Harcourt present compelling opportunities for niche high-yield developments, provided investors can navigate the low-liquidity, high-pricing dynamics characteristic of these regional hubs.

08 Methodology & Data Notes

Data source: PS-0 PropertyScraper autonomously collects listings from PropertyPro.ng, PrivateProperty.com.ng, and NigeriaPropertyCentre.com on a weekly discovery cadence with mid-week health checks.

Neighbourhood normalisation: Raw neighbourhood strings from all portals are normalised to a canonical name via a manually-curated mapping table. Only neighbourhoods with ≥90% normalisation coverage are included in analysis.

Price storage: All prices are stored internally as 64-bit integer kobo values to eliminate floating-point arithmetic errors. NGN figures displayed in this report are exact integer divisions by 100.

Median vs. mean pricing: Median is used throughout to reduce skew from outlier ultra-luxury listings. P25, P75, and P90 data are available in the source dataset but excluded from this summary report for brevity.

Price reductions: An event is recorded when a listing's price decreases between two consecutive observations. Multiple reductions on the same listing count as separate events.

Days on market (DOM): Computed as the number of days between a listing's first observed date and the snapshot date. Listings present since before the pipeline's inception show DOM from the first observation date, not the actual listing date.

Outage handling: On weeks where portal access was blocked or failed, active inventory is carried forward from the prior week. New listing counts are recorded as zero for that week. These weeks are noted in the weekly table.
