01 Executive Summary

The Nigerian residential sales market demonstrated resilient expansion between April and June 2026, characterised by a 9.7% growth in active listings from the first to the final week of the quarter, peaking at 589 active listings. Across 225 unique neighbourhoods, cumulative active listings reached 6,785, supported by 5,695 new listings. This supply injection reflects sustained developer confidence and a steady pipeline of new completions entering the market.

Pricing dynamics remained highly volatile, with weekly median prices fluctuating between a low of ₦177.5M in late May and a peak of ₦260.0M in mid-April, before closing the quarter at ₦243.8M. The market continues to be dominated by high-value transactions, particularly in Lagos and Abuja, where institutional capital and high-net-worth individuals drive premium pricing.

Key Takeaways

- Lagos dominated sales inventory, accounting for 5,263 of the 6,785 cumulative active listings.
- Banana Island remains the most expensive sales market, averaging a median price of ₦2956.7M.
- Active listings grew by 9.7% over the quarter, indicating robust supply-side pipeline expansion.
- Abuja sales prices closely rivalled Lagos, posting a high median price of ₦238.8M.

02 Inventory Distribution — Most Active Areas

The distribution of active listings is heavily concentrated in prime Lagos corridors, with Lekki Phase 1 leading the market with an average of 52.3 active listings per week, followed by Lekki at 40.6 and Ikota at 29.0. This concentration highlights the dominance of the Lekki-Epe axis as the primary hub for residential development and transaction volume. In contrast, secondary markets like Ibadan and Asaba maintained modest inventory levels, averaging 15.8 and 15.0 active listings per week, respectively.

04 Regional Deep Dive

Lagos

Lagos remains the undisputed engine of the national sales market, accounting for 125 of the 225 analysed neighbourhoods, 5,263 active listings, and 4,522 new listings. The state recorded a median sales price of ₦240.0M, driven by intense activity in Lekki Phase 1, and accounted for the vast majority of market activity, reinforcing its position as the primary destination for domestic and diaspora real estate investment.

125	Lekki Phase 1	₦240.0M

Abuja (FCT)

Abuja's sales market represents a highly capitalised segment, spanning 63 neighbourhoods with 883 active listings and 657 new listings. The federal capital territory recorded a median sales price of ₦238.8M, closely rivalled by Lagos, with Katampe emerging as the top-performing neighbourhood and Guzape commanding premium pricing at an average median of ₦622.7M.

NEIGHBOURHOODS	TOP AREA	MEDIAN PRICE
63	Katampe	₦238.8M

Other Cities (Ibadan, Enugu, Port Harcourt, Edo, Ogun, Imo)

Beyond the two primary hubs, regional markets exhibited diverse performance. Ibadan led secondary markets with 240 active listings and a median price of ₦92.5M, while Port Harcourt maintained a premium median price of ₦175.0M across 87 active listings. Ogun State offered the most affordable regional entry point with 187 active listings and a median price of ₦9.5M, heavily influenced by low-cost land and residential developments in Ijebu Ode.

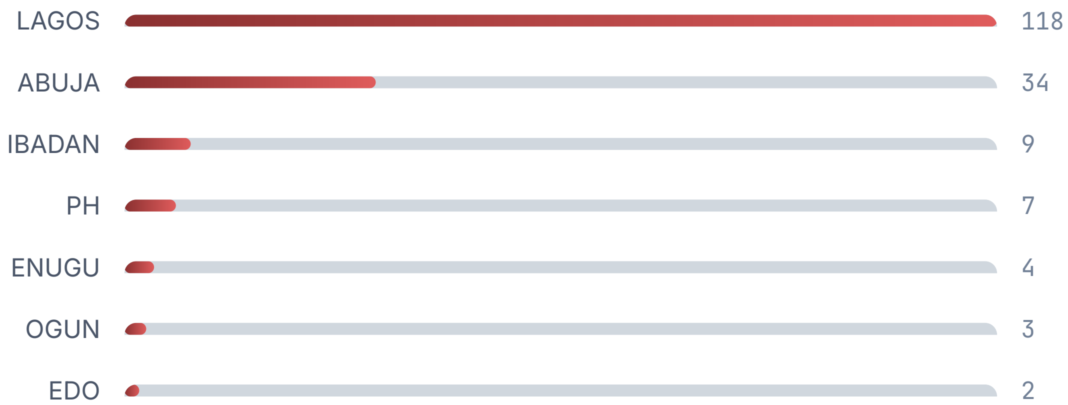
06 Price Reduction Analysis

A total of 177 price reduction events occurred during the quarter, peaking at 30 reductions during the week of 27 April 2026. Lagos accounted for the lion's share with 118 reductions, followed by Abuja with 34, signalling selective price corrections as sellers adjusted expectations to meet liquidity constraints and shifting buyer leverage in highly competitive luxury segments.

Peak reduction week: 2026-04-27 with 30 events.



07 Market Outlook

The 9.7% expansion in active listings alongside sustained high median prices suggests that the sales market will enter the next quarter with strong supply-side momentum. However, the presence of price reductions in premium nodes indicates that developers must adopt realistic pricing strategies to maintain velocity, particularly as secondary markets like Ibadan and Port Harcourt begin to capture spillover demand from capital-constrained buyers.

01 Executive Summary

The residential rental market experienced substantial expansion during the second quarter of 2026, with active listings growing by 24.3% from the first to the final week, peaking at 614 active listings. Across 176 unique neighbourhoods, cumulative active listings reached 6,819, supported by 5,770 new rental listings. This rapid supply growth reflects a highly active leasing environment as tenants navigate changing economic conditions.

Rental pricing trends showed upward pressure towards the end of the quarter, with the weekly median rental price rising from ₦6.4M/yr in early April to ₦6.0M/yr by late June, after dipping to ₦4.0M/yr in mid-April. This volatility highlights a highly segmented market where premium luxury rentals in Lagos and Abuja skew overall averages, while mid-market demand remains highly price-sensitive.

Key Takeaways

→ Active rental listings grew by 24.3% over the quarter, indicating a rapidly expanding rental supply.

→ Banana Island commanded the highest rental prices, averaging ₦48.1M/yr with a low 2.9 days on market.

→ Lagos dominated rental activity, accounting for 5,983 of the 6,819 cumulative active listings.

→ Abuja posted a premium median rental price of ₦8.2M/yr, driven by Gwarinpa.

02 Inventory Distribution — Most Active Areas

Rental inventory is heavily concentrated in premium Lagos neighbourhoods, led by Lekki Phase 1 with an average of 69.0 active listings per week, followed by Lekki at 41.7 and Ikoyi at 36.6. This concentration indicates that developers are focusing rental supply on high-yield coastal corridors. Conversely, secondary rental markets like Ibadan and Port Harcourt showed much lower inventory levels, reflecting more localised demand patterns.

04 Regional Deep Dive

Lagos

Lagos remains the dominant rental market, encompassing 118 neighbourhoods, 5,983 active listings, and 5,037 new listings. The state recorded a median rental price of ₦4.1M/yr, driven by high-volume leasing activity in Lekki Phase 1, which continues to serve as the primary destination for corporate tenants and young professionals.

118	Lekki Phase 1	₦4.1M/yr

Abuja (FCT)

Abuja's rental market presents a premium profile, spanning 46 neighbourhoods with 605 active listings and 526 new listings. The federal capital territory posted a high median rental price of ₦8.2M/yr, with Gwarinpa emerging as the top rental neighbourhood, driven by strong demand from diplomatic, public sector, and corporate tenants seeking secure, high-quality accommodation.

NEIGHBOURHOODS	TOP AREA	MEDIAN PRICE
46	Gwarinpa	₦8.2M/yr

Other Cities (Ibadan, Enugu, Port Harcourt, Edo, Ogun, Imo)

Regional rental markets showed varied performance, with Port Harcourt commanding a premium median rent of ₦13.5M/yr across 13 active listings, reflecting localised oil and gas sector demand. Ibadan recorded 186 active listings with a median rent of ₦2.6M/yr, while Ogun State offered highly affordable options with a median rent of ₦1.2M/yr across 25 active listings.

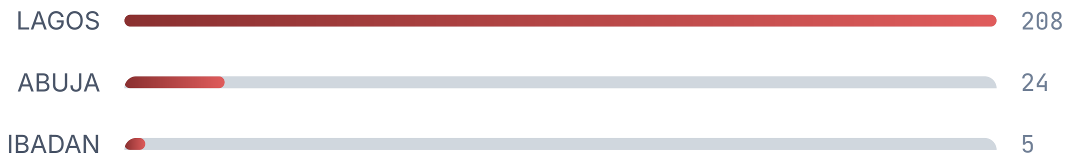
06 Price Reduction Analysis

The rental market recorded 237 price reduction events, peaking at 39 reductions during the week of 8 June 2026. Lagos accounted for 208 of these reductions, indicating that landlords in premium areas are increasingly willing to adjust asking rents to avoid prolonged vacancies and secure reliable, liquid tenants in a competitive market.

Peak reduction week: 2026-06-08 with 39 events.



07 Market Outlook

The 24.3% growth in active rental listings suggests that supply is expanding faster than immediate absorption, which may lead to further price corrections in premium segments. Landlords will likely need to offer more flexible payment terms or modest rent reductions to maintain occupancy rates, while mid-market demand in mainland Lagos and regional hubs like Ibadan will remain resilient.

08 Methodology & Data Notes

Data source: PS-0 PropertyScraper autonomously collects listings from PropertyPro.ng, PrivateProperty.com.ng, and NigeriaPropertyCentre.com on a weekly discovery cadence with mid-week health checks.

Neighbourhood normalisation: Raw neighbourhood strings from all portals are normalised to a canonical name via a manually-curated mapping table. Only neighbourhoods with ≥90% normalisation coverage are included in analysis.

Price storage: All prices are stored internally as 64-bit integer kobo values to eliminate floating-point arithmetic errors. NGN figures displayed in this report are exact integer divisions by 100.

Median vs. mean pricing: Median is used throughout to reduce skew from outlier luxury listings. P25, P75, and P90 data are available in the source dataset but excluded from this summary report for brevity.

Price reductions: An event is recorded when a listing's price decreases between two consecutive observations. Multiple reductions on the same listing count as separate events.

Days on market (DOM): Computed as the number of days between a listing's first observed date and the snapshot date. Listings present since before the pipeline's inception show DOM from the first observation date, not the actual listing date.

Outage handling: On weeks where portal access was blocked or failed, active inventory is carried forward from the prior week. New listing counts are recorded as zero for that week. These weeks are noted in the weekly table.
