01

Executive Summary

The residential sales listings tracked online between April and June 2026 demonstrated steady market expansion, with cumulative active listings reaching 7,098 across 229 unique neighbourhoods. A robust supply of 5,991 new listings entered the market over the 3-month period, reflecting steady developer activity. The weekly active volume peaked at 303 listings in the final week of June, showing growing discovery throughput over the quarter.

Pricing dynamics remained firm at the upper end, reflecting high capital value requests in primary hubs. The overall median price of online sales listings settled at ₦220.0M, strongly influenced by prime listings in Lagos (median of ₦250.0M) and Abuja (median of ₦250.0M). Meanwhile, 177 price reduction events were recorded, indicating tactical adjustments by sellers trying to clear inventory amid a highly competitive digital showcase.

## Key Takeaways

- Online sales listings peaked at 303 active entries, with a median asking price of ₦220.0M.
- Lagos and Abuja remain the primary digital hubs, representing over 90% of active listings.
- Enugu and Port Harcourt lead secondary hubs in capital value, posting medians of ₦185.5M and ₦165.0M.
- A total of 177 price reductions indicate select seller adjustments to increase transaction speed.

**Data Scope & Scraper Limitations:** This report represents observations collected solely through the PS-0 PropertyScraper pipeline from advertised online listings. It should be understood as a specific digital lens on advertised prices and online inventory, not as an absolute, exhaustive generalisation of the entire physical real estate market across Nigeria.

02

## Inventory Distribution — Most Active Areas

Lagos remained the dominant node for online sales visibility, accounting for 127 of the 229 tracked neighbourhoods and 5,523 cumulative active listings. Abuja maintained a strong secondary footprint with 65 neighbourhoods and 919 active listings, while regional hubs like Oyo (Ibadan) and Ogun posted 245 and 193 active listings respectively. Lekki emerged as the single most active online neighbourhood, representing a primary focus area for developer inventory.

## 03 Pricing Tiers — Expensive & Affordable

The pricing spectrum for online listings is highly stratified. High-value administrative and commercial capitals established the luxury ceiling, led by premium Lagos enclaves and prime Abuja sectors. In secondary markets, Enugu (median of ₦185.5M across 3 neighbourhoods) and Port Harcourt (median of ₦165.0M across 3 neighbourhoods) posted significant median prices, reflecting concentrated premium inventory, while Oyo/Ibadan (median of ₦135.0M) showed solid capital appreciation. Edo (median of ₦75.0M), Imo (median of ₦4.25M), and Ogun (median of ₦10.5M) represented the more affordable residential frontiers.

## Regional Performance Deep Dive

Lagos dominated online sales activity, posting a median price of ₦250.0M across 127 active neighbourhoods, with Lekki remaining the top active area. The market showed high volume with 4,772 new listings, indicating a strong digital footprint. Abuja spanned 65 active neighbourhoods with Benin (normalisation mapping) emerging as the top area, posting a solid median price of ₦250.0M and 686 new listings, highlighting steady capital territory demand. Secondary markets displayed varied pricing structures. Enugu (median ₦185.5M) and Port Harcourt (median ₦165.0M) represented high-value regional hubs, while Oyo/Ibadan (median ₦135.0M) showed solid capital appreciation. Edo (median ₦75.0M), Imo (median ₦4.25M), and Ogun (median ₦10.5M) represented the more affordable residential frontiers.

A total of 177 price reduction events were recorded across all sales listings, serving as a key indicator of asking price resistance. These corrections suggest that some sellers are adjusting expectations to match active buyer limits.

**Peak reduction week:** 2026-04-27 with 30 events.

The high volume of 5,991 new listings relative to active inventory suggests that online supply remains robust. Median prices are expected to remain consolidated around current levels, with secondary hubs like Enugu and Port Harcourt presenting high capital value opportunities.

01

Executive Summary

The residential rental market visible online between April and June 2026 was characterised by extensive listing activity, showing 7,157 cumulative active listings across 181 unique neighbourhoods. The discovery of 6,075 new listings during the month provided a steady flow of fresh rental options, while weekly active listings peaked at 318 entries in the final week of June.

Rental pricing demonstrated premium asking rates in major urban hubs, resulting in a national median rent of ₦7.0M/yr. Abuja registered the highest median asking rent of ₦10.0M/yr across 49 neighbourhoods, driven by corporate and diplomatic demand, while Lagos maintained a median of ₦7.0M/yr. Landlords made 237 price reductions during the month, showing active pricing adjustments to prevent vacancies in a highly competitive online rental market.

## Key Takeaways

- Online rental listings peaked at 318 active entries, with a median rent of ₦7.0M/yr.
- Abuja commanded the highest rental premium with a median of ₦10.0M/yr, followed by Lagos at ₦7.0M/yr.
- Port Harcourt led regional rental yields, posting a median rent of ₦13.5M/yr.
- A total of 237 price reductions indicate active adjustments to secure tenants quickly.

**Data Scope & Scraper Limitations:** This report represents observations collected solely through the PS-0 PropertyScraper pipeline from advertised online listings. It should be understood as a specific digital lens on advertised prices and online inventory, not as an absolute, exhaustive generalisation of the entire physical real estate market across Nigeria.

02

## Inventory Distribution — Most Active Areas

Lagos and Abuja dominated online rental listings, with Lagos accounting for 120 neighbourhoods and 6,285 active listings, and Abuja registering 49 neighbourhoods and 637 active listings. Ibadan emerged as the largest secondary rental market, posting 190 active listings across 5 neighbourhoods, highlighting Oyo state as a growing residential destination for renters seeking affordability outside Lagos.

## Pricing Tiers — Expensive & Affordable

Rental pricing remains heavily skewed by location. Port Harcourt led secondary markets with a median rent of ₦13.5M/yr across 2 active neighbourhoods, reflecting corporate demand in Rivers state. In contrast, Ibadan (median of ₦2.7M/yr), Enugu (median of ₦2.0M/yr), and Ogun (median of ₦1.2M/yr) offered accessible entry points for middle-income tenants.

06

Price Reduction Analysis

A total of 237 price reduction events were tracked, showing that rental listing rates are subject to active corrections by landlords seeking to avoid extended vacancy periods.

**Peak reduction week:** 2026-06-08 with 39 events.

07

Market Outlook

The steady influx of 6,075 new listings suggests that rental supply will remain healthy. Premium rental rates are expected to persist in core corporate hubs like Lagos and Abuja, while Ibadan will continue to gain traction.

**Data source:** PS-0 PropertyScraper autonomously collects listings from PropertyPro.ng, PrivateProperty.com.ng, and NigeriaPropertyCentre.com on a weekly discovery cadence with mid-week health checks.

**Neighbourhood normalisation:** Raw neighbourhood strings from all portals are normalised to a canonical name via a manually-curated mapping table. Only neighbourhoods with  $\geq 90\%$  normalisation coverage are included in analysis.

**Price storage:** All prices are stored internally as 64-bit integer kobo values to eliminate floating-point arithmetic errors. NGN figures displayed in this report are exact integer divisions by 100.

**Median vs. mean pricing:** Median is used throughout to reduce skew from outlier luxury listings. P25, P75, and P90 data are available in the source dataset but excluded from this summary report for brevity.

**Price reductions:** An event is recorded when a listing's price decreases between two consecutive observations. Multiple reductions on the same listing count as separate events.

**Days on market (DOM):** Computed as the number of days between a listing's first observed date and the snapshot date. Listings present since before the pipeline's inception show DOM from the first observation date, not the actual listing date.

**Outage handling:** On weeks where portal access was blocked or failed, active inventory is carried forward from the prior week. New listing counts are recorded as zero for that week. These weeks are noted in the weekly table.

**General Information Only:** The data, analysis, and narratives presented in this report are provided for general informational, educational, and research purposes only. This report does not constitute investment, financial, legal, tax, or real estate advice.

**No Warranties:** While reasonable efforts are made to ensure the accuracy and reliability of the scraped listings and calculated metrics, all information is provided "as is" without warranties of any kind, express or implied. Real estate market conditions are dynamic, and historical scraping observations may not reflect future market cycles or performance.

**Limitation of Liability:** Isaac Akinmokun and the contributors to this platform disclaim any and all liability for any direct, indirect, incidental, or consequential loss or damage incurred by any party arising out of or in connection with the use of, reliance on, or decisions made based on the data and analyses contained in this publication.
