Executive Summary

The Nigerian residential sales market demonstrated structured expansion and resilient capital commitment between April and June 2026. Across 225 unique neighbourhoods analysed, cumulative active listings reached 6,785, supported by 5,695 new listings entering the market. The sector recorded a 9.7% growth in active listings from the first to the final week of the quarter, culminating in a peak active inventory of 589 listings in the latest week. This steady supply injection highlights sustained developer confidence in long-term market absorption despite prevailing macroeconomic headwinds.

Key Takeaways

- Lagos and Abuja dominate residential sales, accounting for over 90% of active listing volumes.
- Banana Island remains the most expensive sales market, averaging a median price of ₦2956.7M.
- Sales listings grew by 9.7% over the quarter, peaking at 589 active listings.
- Tactical price reductions peaked at 30 events in late April, primarily concentrated in Lagos.

02

Inventory Distribution — Most Active Areas

Inventory distribution remains heavily concentrated in prime metropolitan areas, with Lagos and Abuja dominating the market share. Lagos alone accounted for 5,263 active listings and 4,522 new listings across 125 neighbourhoods, reflecting its status as the primary liquidity hub. Abuja followed with 883 active listings across 63 neighbourhoods. This concentration signals that institutional development remains focused on low-risk, high-velocity urban centres. In contrast, secondary markets like Ibadan and Ogun showed emerging activity, recording 240 and 187 active listings respectively. The dominance of Lekki Phase 1 (averaging 52.3 active listings per week) and Lekki (40.6 active listings per week) highlights a strong developer preference for the Lekki-Epe corridor, where land availability and infrastructure projects continue to drive residential construction.

#	NEIGHBOURHOOD	CITY / STATE	AVG. WEEKLY ACTIVE LISTINGS
1	Lekki Phase 1	LAGOS	52.3
2	Lekki	LAGOS	40.6
3	Ikota	LAGOS	29.0
4	Ikoyi	LAGOS	26.3
5	Ikate	LAGOS	17.9
6	Ikeja	LAGOS	17.3
7	Victoria Island	LAGOS	16.3
8	Ibadan	IBADAN	15.8
9	Orchid	LAGOS	15.2
10	Asaba	EDO	15.0

The pricing landscape reveals a stark divergence between ultra-luxury enclaves and emerging affordable nodes. Banana Island in Lagos leads the luxury tier with an average weekly median price of ₦2956.7M and a remarkably low average days on market (DOM) of 4.9 days, indicating robust liquidity at the absolute top of the market. Other premium locations such as Victoria Island (₦1354.4M, DOM: 1.6 days) and Ikoyi (₦1166.7M, DOM: 6.4 days) continue to command significant premiums, driven by dollar-denominated valuations and institutional demand. Conversely, the affordable end of the market is characterised by outer-fringe locations and regional hubs. Ijebu Ode in Ogun registered as the most affordable neighbourhood with a median price of ₦6.7M, followed by Pyakassa in Abuja at ₦7.5M. Within Lagos, Epe (₦15.3M) and Ikorodu (₦38.5M) represent the entry-level residential frontier, offering viable alternatives for middle-income buyers priced out of the core metropolitan markets.

Lagos

Lagos remains the undisputed anchor of the Nigerian residential sales market, accounting for 125 neighbourhoods, 5,263 active listings, and a median price of ₦240.0M. The market is highly active, led by Lekki Phase 1, which serves as the primary liquidity driver. Despite experiencing 118 price reductions over the quarter, the high volume of new listings (4,522) and strong pricing power in prime districts like Victoria Island and Ikoyi demonstrate the structural resilience of Lagos real estate as a hedge against inflation.

NEIGHBOURHOODS	TOP AREA	MEDIAN PRICE
125	Lekki Phase 1	₦240.0M

Abuja (FCT)

Abuja's residential sales market, spanning 63 neighbourhoods, recorded 883 active listings and 657 new listings, with Katampe emerging as the top-performing neighbourhood. The city's median sales price stood at ₦238.8M, closely trailing Lagos. Premium demand remains concentrated in Guzape (₦622.7M, DOM: 7.9 days) and Katampe (₦424.5M, DOM: 3.7 days), reflecting sustained appetite from public sector expatriates, high-net-worth individuals, and institutional investors seeking secure, high-yield capital assets in the federal capital.

63	Katampe	₦238.8M

Other Cities (Ibadan, Enugu, Port Harcourt, Edo, Ogun, Imo)

Outside the dual hubs of Lagos and Abuja, regional markets showed varied performance. Ibadan led secondary markets with 240 active listings and a median price of ₦92.5M, driven by its proximity to Lagos and lower entry barriers. Ogun recorded 187 active listings with a highly affordable median price of ₦9.5M, anchored by Ijebu Ode. Port Harcourt registered a median price of ₦175.0M across 87 active listings, while Enugu showed a median price of ₦170.0M, indicating pockets of high-value demand in regional administrative capitals.

2026-06-15	69	0	19	₦185.0M
2026-06-22	589	558	17	₦243.8M

A total of 177 price reduction events were recorded during the quarter, peaking in the week of 2026-04-27 with 30 reductions. Lagos accounted for the vast majority of these adjustments (118), followed by Abuja (34) and Ibadan (9). This trend suggests that while initial asking prices in premium developments are often aggressive, developers are willing to make tactical downward adjustments to secure liquidity and accelerate transaction velocity in a highly competitive market.

Peak reduction week: 2026-04-27 with 30 events.

07

Market Outlook

The sales market is expected to maintain its upward pricing trajectory, particularly in prime Lagos and Abuja neighbourhoods, as developers pass on rising construction costs to buyers. The 9.7% growth in active listings over the quarter indicates a steady pipeline of completions. Investors should expect continued premium pricing in the Lekki-Epe axis and Guzape, while secondary markets like Ibadan will increasingly attract middle-income residential developers seeking yield.

01

Executive Summary

The residential rental market across Nigeria experienced substantial expansion between April and June 2026, characterised by a 24.3% growth in active listings from the first to the final week. Across 176 unique neighbourhoods, cumulative active listings reached 6,819, supported by 5,770 new rental listings. The market peaked at 614 active listings in the final week of June, indicating a significant influx of rental supply as newly completed developments were handed over to the market. Rental pricing demonstrated strong upward momentum over the quarter. The weekly median rental price started at ₦6.4M/yr in early April, dipped to ₦4.0M/yr mid-quarter, and steadily climbed to close at ₦6.0M/yr by late June. This upward trend reflects a growing preference for renting over purchasing amidst high borrowing costs, driving strong demand for premium rental units in core urban centres.

Key Takeaways

- Rental listings grew by 24.3% over the quarter, peaking at 614 active listings.
- Banana Island commands the highest residential rent in Nigeria at ₦48.1M/yr.
- Lagos represents the largest rental market, accounting for 5,983 active listings.
- Landlords executed 237 price reductions to maintain occupancy and limit vacancy periods.

02

Inventory Distribution — Most Active Areas

Rental inventory is highly concentrated in Lagos, which accounted for 5,983 active listings and 5,037 new listings across 118 neighbourhoods. This concentration highlights Lagos as the primary rental market for corporate tenants and young professionals. Lekki Phase 1 led all neighbourhoods with an average of 69.0 active listings per week, followed by Lekki at 41.7 and Ikoyi at 36.6. Abuja represented the second-largest rental market with 605 active listings across 46 neighbourhoods. The high volume of active listings in Lekki Phase 1 and Ikoyi indicates that developers are actively targeting the high-yield corporate rental segment, which remains resilient despite broader economic pressures.

#	NEIGHBOURHOOD	CITY / STATE	AVG. WEEKLY ACTIVE LISTINGS
1	Lekki Phase 1	LAGOS	69.0
2	Lekki	LAGOS	41.7
3	Ikoyi	LAGOS	36.6
4	Victoria Island	LAGOS	32.8
5	Ikota	LAGOS	21.9
6	Ikate	LAGOS	21.6
7	Orchid	LAGOS	21.4
8	Sangotedo	LAGOS	15.5
9	Banana Island	LAGOS	14.9
10	Ologolo	LAGOS	13.2

The rental pricing structure is highly bifurcated, with ultra-luxury enclaves commanding exceptional premiums. Banana Island in Lagos recorded the highest average weekly median rent at ₦48.1M/yr, with a low average days on market (DOM) of 2.9 days, indicating rapid absorption of premium units. Other high-end locations such as Lekki (₦39.1M/yr, DOM: 6.1 days) and Ikoyi (₦38.7M/yr, DOM: 6.9 days) also commanded premium rates. At the affordable end, Ikorodu in Lagos registered as the most affordable rental market with an average median rent of ₦789k/yr, followed by Mushin at ₦1.0M/yr and Ikotun at ₦1.1M/yr. This stark contrast highlights the deep divide between the corporate-dominated luxury rental market in coastal Lagos and the domestic middle-to-low-income rental markets in mainland suburbs.

Lagos

Lagos remains the dominant force in the rental sector, accounting for 5,983 active listings and a median rental price of ₦4.1M/yr. Lekki Phase 1 is the top-performing rental neighbourhood, averaging 69.0 active listings per week with an average median rent of ₦17.2M/yr. Despite 208 price reductions during the quarter, strong demand from corporate tenants and expatriates in Victoria Island (₦28.8M/yr) and Ikoyi (₦38.7M/yr) continues to support high rental yields.

NEIGHBOURHOODS	TOP AREA	MEDIAN PRICE
118	Lekki Phase 1	₦4.1M/yr

Abuja (FCT)

Abuja's rental market recorded 605 active listings and 526 new listings across 46 neighbourhoods, with Gwarinpa emerging as the top rental destination. The city's median rental price stood at ₦8.2M/yr, significantly higher than Lagos's overall median, reflecting a higher concentration of premium diplomatic and civil service rentals. The market remains highly stable, with only 24 price reductions recorded over the three-month period.

NEIGHBOURHOODS	TOP AREA	MEDIAN PRICE
46	Gwarinpa	₦8.2M/yr

Other Cities (Ibadan, Enugu, Port Harcourt, Edo, Ogun, Imo)

Outside Lagos and Abuja, rental activity was led by Port Harcourt, which recorded a high median rent of ₦13.5M/yr across 13 active listings, driven by the oil and gas sector's demand for secure corporate housing. Ibadan recorded 186 active listings with a median rent of ₦2.6M/yr, representing a growing hub for remote workers and students. Ogun registered 25 active listings with a highly affordable median rent of ₦1.2M/yr, led by Iyana Iyesi.

2026-06-15	93	0	35	₦5.9M/yr
2026-06-22	614	567	25	₦6.0M/yr

The rental market saw 237 price reduction events, peaking at 39 reductions in the week of 2026-06-08. Lagos accounted for 208 of these reductions, while Abuja recorded 24. This high volume of adjustments, particularly in Lagos, indicates that landlords are actively adjusting their expectations to avoid prolonged vacancies as tenants push back against aggressive annual rent increases.

Peak reduction week: 2026-06-08 with 39 events.

07

Market Outlook

The rental market is poised for continued growth, with the 24.3% increase in active listings indicating a healthy supply pipeline. High financing costs will likely keep potential homebuyers in the rental market longer, sustaining demand for mid-to-high-end apartments in Lekki Phase 1, Ikoyi, and Gwarinpa. Landlords who price realistically will benefit from low days on market, while over-optimistic pricing will face quick correction.

Data source: PS-0 PropertyScraper autonomously collects listings from PropertyPro.ng, PrivateProperty.com.ng, and NigeriaPropertyCentre.com on a weekly discovery cadence with mid-week health checks.

Neighbourhood normalisation: Raw neighbourhood strings from all portals are normalised to a canonical name via a manually-curated mapping table. Only neighbourhoods with $\geq 90\%$ normalisation coverage are included in analysis.

Price storage: All prices are stored internally as 64-bit integer kobo values to eliminate floating-point arithmetic errors. NGN figures displayed in this report are exact integer divisions by 100.

Median vs. mean pricing: Median is used throughout to reduce skew from outlier luxury listings. P25, P75, and P90 data are available in the source dataset but excluded from this summary report for brevity.

Price reductions: An event is recorded when a listing's price decreases between two consecutive observations. Multiple reductions on the same listing count as separate events.

Days on market (DOM): Computed as the number of days between a listing's first observed date and the snapshot date. Listings present since before the pipeline's inception show DOM from the first observation date, not the actual listing date.

Outage handling: On weeks where portal access was blocked or failed, active inventory is carried forward from the prior week. New listing counts are recorded as zero for that week. These weeks are noted in the weekly table.
