01

Executive Summary

The residential sales listings tracked online during June 2026 demonstrated concentrated activity across core metropolitan centres, with cumulative active listings reaching 2,206 across 166 unique neighbourhoods. A substantial supply injection of 1,872 new listings entered the market, indicating active developer pipelines trying to capture buyer attention. The weekly active volume peaked at 303 listings in the final week of June, showing steady discovery throughput over the four-week observation window.

Pricing dynamics remained firm at the upper end, reflecting high capital value requests in primary hubs. The overall median price of online sales listings settled at ₦215.0M, strongly influenced by prime listings in Lagos (median of ₦249.0M) and Abuja (median of ₦230.0M). Meanwhile, 72 price reduction events were recorded, indicating tactical adjustments by sellers trying to clear inventory amid a highly competitive digital showcase.

Key Takeaways

- Online sales listings peaked at 303 active entries, with a median asking price of ₦215.0M.
- Lagos and Abuja remain the primary digital hubs, representing over 90% of active listings.
- Enugu and Port Harcourt lead secondary hubs in capital value, posting medians of ₦220.0M and ₦170.0M.
- A total of 72 price reductions indicate select seller adjustments to increase transaction speed.

Data Scope & Scraper Limitations: This report represents observations collected solely through the PS-0 PropertyScraper pipeline from advertised online listings. It should be understood as a specific digital lens on advertised prices and online inventory, not as an absolute, exhaustive generalisation of the entire physical real estate market across Nigeria.

02

Inventory Distribution — Most Active Areas

Lagos remained the dominant node for online sales visibility, accounting for 92 of the 166 tracked neighbourhoods and 1,709 cumulative active listings. Abuja maintained a strong secondary footprint with 50 neighbourhoods and 305 active listings, while regional hubs like Oyo (Ibadan) and Ogun posted 57 and 72 active listings respectively. Lekki emerged as the single most active online neighbourhood, representing a primary focus area for developer inventory.

The pricing spectrum for online listings is highly stratified. High-value administrative and commercial capitals established the luxury ceiling, led by premium Lagos enclaves and prime Abuja sectors. In secondary markets, Enugu (median of ₦220.0M across 3 neighbourhoods) and Port Harcourt (median of ₦170.0M across 2 neighbourhoods) posted significant median prices, reflecting concentrated premium inventory, while Ogun (median of ₦9.5M) and Imo (median of ₦12.0M) represented entry-level options.

Lagos dominated online sales activity, posting a median price of ₦249.0M across 92 active neighbourhoods, with Lekki remaining the top active area. The market showed high volume with 1,474 new listings, indicating a strong digital footprint. Abuja spanned 50 active neighbourhoods with Galadimawa emerging as the top area, posting a solid median price of ₦230.0M and 242 new listings, highlighting steady capital territory demand. Secondary markets displayed varied pricing structures. Enugu (median ₦220.0M) and Port Harcourt (median ₦170.0M) represented high-value regional hubs, while Oyo/Ibadan (median ₦152.5M) showed solid capital appreciation. Edo (median ₦26.0M), Imo (median ₦12.0M), and Ogun (median ₦9.5M) represented the more affordable residential frontiers.

06

Price Reduction Analysis

A total of 72 price reduction events were recorded across all sales listings, serving as a key indicator of asking price resistance. These corrections suggest that some sellers are adjusting expectations to match active buyer limits.

Peak reduction week: 2026-06-15 with 19 events.

07

Market Outlook

The high volume of 1,872 new listings relative to active inventory suggests that online supply remains robust. Median prices are expected to remain consolidated around current levels, with secondary hubs like Enugu and Port Harcourt presenting high capital value opportunities.

RENTALS MARKET ANALYSIS

PEAK ACTIVE LISTINGS 318 Latest week total	NEW LISTINGS 1,940 Discovered this period	PRICE REDUCTIONS 126 Seller adjustments tracked
INVENTORY GROWTH -56.3% First → last week	NEIGHBOURHOODS TRACKED 134 Across 6 cities	

01

Executive Summary

The residential rental market visible online in June 2026 was characterised by extensive listing activity, showing 2,346 cumulative active listings across 134 unique neighbourhoods. The discovery of 1,940 new listings during the month provided a steady flow of fresh rental options, while weekly active listings peaked at 318 entries in the final week of June.

Rental pricing demonstrated premium asking rates in major urban hubs, resulting in a national median rent of ₦7.0M/yr. Abuja registered the highest median asking rent of ₦10.0M/yr across 33 neighbourhoods, driven by corporate and diplomatic demand, while Lagos maintained a median of ₦7.0M/yr. Landlords made 126 price reductions during the month, showing active pricing adjustments to prevent vacancies in a highly competitive online rental market.

Key Takeaways

- Online rental listings peaked at 318 active entries, with a median rent of ₦7.0M/yr.
- Abuja commanded the highest rental premium with a median of ₦10.0M/yr, followed by Lagos at ₦7.0M/yr.
- Port Harcourt led regional rental yields, posting a median rent of ₦13.5M/yr.
- A total of 126 price reductions indicate active adjustments to secure tenants quickly.

Data Scope & Scraper Limitations: This report represents observations collected solely through the PS-0 PropertyScraper pipeline from advertised online listings. It should be understood as a specific digital lens on advertised prices and online inventory, not as an absolute, exhaustive generalisation of the entire physical real estate market across Nigeria.

02

Inventory Distribution — Most Active Areas

Lagos and Abuja dominated online rental listings, with Lagos accounting for 94 neighbourhoods and 2,076 active listings, and Abuja registering 33 neighbourhoods and 201 active listings. Ibadan emerged as the largest secondary rental market, posting 50 active listings across 3 neighbourhoods, highlighting Oyo state as a growing residential destination for renters seeking affordability outside Lagos.

Pricing Tiers — Expensive & Affordable

Rental pricing remains heavily skewed by location. Port Harcourt led secondary markets with a median rent of ₦13.5M/yr across 2 active neighbourhoods, reflecting corporate demand in Rivers state. In contrast, Ibadan (median of ₦2.7M/yr), Enugu (median of ₦2.1M/yr), and Ogun (median of ₦1.85M/yr) offered accessible entry points for middle-income tenants.

Regional Performance Deep Dive

Lagos rentals posted a median of ₦7.0M/yr across 94 neighbourhoods, with Lekki Phase 1 representing the primary hub. Landlords adjusted 126 listings downward, reflecting competitive pressure. Abuja rentals commanded a premium median of ₦10.0M/yr across 33 neighbourhoods, with Jahi emerging as the top active rental area, driven by steady demand in the capital city. Regional rental hubs showed distinct yield profiles. Port Harcourt commanded a premium median of ₦13.5M/yr, while Ibadan (median ₦2.7M/yr), Enugu (median ₦2.1M/yr), and Ogun (median ₦1.85M/yr) represented accessible options.

A total of 126 price reduction events were tracked, showing that rental listing rates are subject to active corrections by landlords seeking to avoid extended vacancy periods.

Peak reduction week: 2026-06-08 with 39 events.

The steady influx of 1,940 new listings suggests that rental supply will remain healthy. Premium rental rates are expected to persist in core corporate hubs like Lagos and Abuja, while Ibadan will continue to gain traction.

Data source: PS-0 PropertyScraper autonomously collects listings from PropertyPro.ng, PrivateProperty.com.ng, and NigeriaPropertyCentre.com on a weekly discovery cadence with mid-week health checks.

Neighbourhood normalisation: Raw neighbourhood strings from all portals are normalised to a canonical name via a manually-curated mapping table. Only neighbourhoods with $\geq 90\%$ normalisation coverage are included in analysis.

Price storage: All prices are stored internally as 64-bit integer kobo values to eliminate floating-point arithmetic errors. NGN figures displayed in this report are exact integer divisions by 100.

Median vs. mean pricing: Median is used throughout to reduce skew from outlier luxury listings. P25, P75, and P90 data are available in the source dataset but excluded from this summary report for brevity.

Price reductions: An event is recorded when a listing's price decreases between two consecutive observations. Multiple reductions on the same listing count as separate events.

Days on market (DOM): Computed as the number of days between a listing's first observed date and the snapshot date. Listings present since before the pipeline's inception show DOM from the first observation date, not the actual listing date.

Outage handling: On weeks where portal access was blocked or failed, active inventory is carried forward from the prior week. New listing counts are recorded as zero for that week. These weeks are noted in the weekly table.
