# Nigerian Residential Real Estate Market Report

August 2026 — 2026-08-03 to 2026-08-31

PS-0 PropertyScraper  10 Cities  239 Neighbourhoods  5 Weeks of Data  Published September 1, 2026

## Sales Market Analysis

| PEAK ACTIVE LISTINGS | NEW LISTINGS | PRICE REDUCTIONS | INVENTORY GROWTH | NEIGHBOURHOODS TRACKED |
|---|---|---|---|---|
| 7,249 | 1,089 | 68 | 13.6% | 239 |
| Latest week total | Discovered this period | Seller adjustments tracked | First → last week | Across 10 cities |

### 01 Executive Summary

The residential sales market in August 2026 demonstrated steady expansion in online listing volumes, with cumulative active listings reaching 34,500 across 239 unique neighbourhoods. Active listings grew by 13.6% over the month, rising from 6,379 in the first week to a peak of 7,249 in the final week. This inventory accumulation occurred alongside a highly stable overall pricing environment, as the national weekly median listing price remained unchanged at ₦190.0M throughout the entire five-week period.

### Key Takeaways

→ Active sales listings grew by 13.6% over August, peaking at 7,249 listings.

→ The national median sales price held completely flat at ₦190.0M.

→ Banana Island remains the nation's most expensive market at ₦4,621.5M.

→ Lagos and Abuja combined represent over 90% of active sales listings.

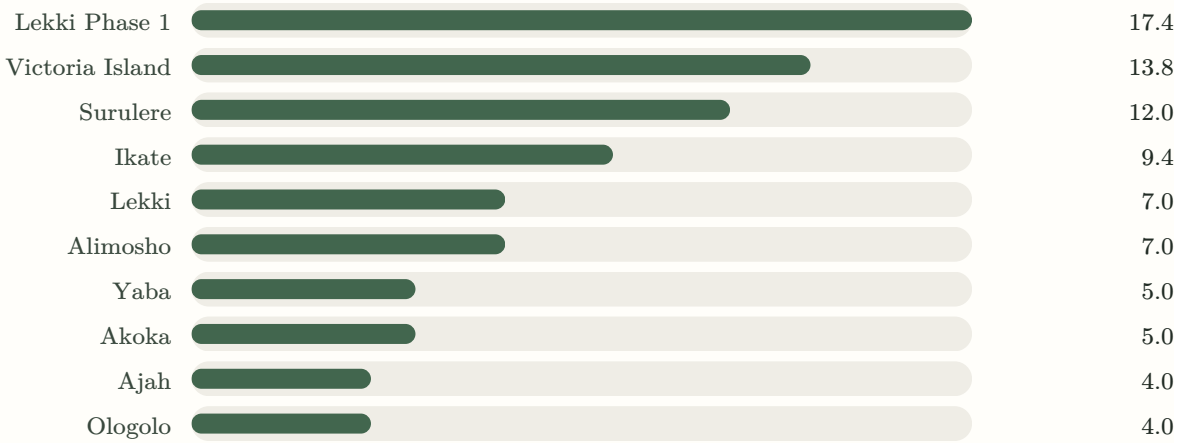

→ Price reductions were minimal, with only 68 events recorded nationwide.

**Data Scope & Scraper Limitations:** This report represents observations collected solely through the PS-0 PropertyScraper pipeline from advertised online listings. It should be understood as a specific digital lens on advertised prices and online inventory, not as an absolute, exhaustive generalisation of the entire physical real estate market across Nigeria.

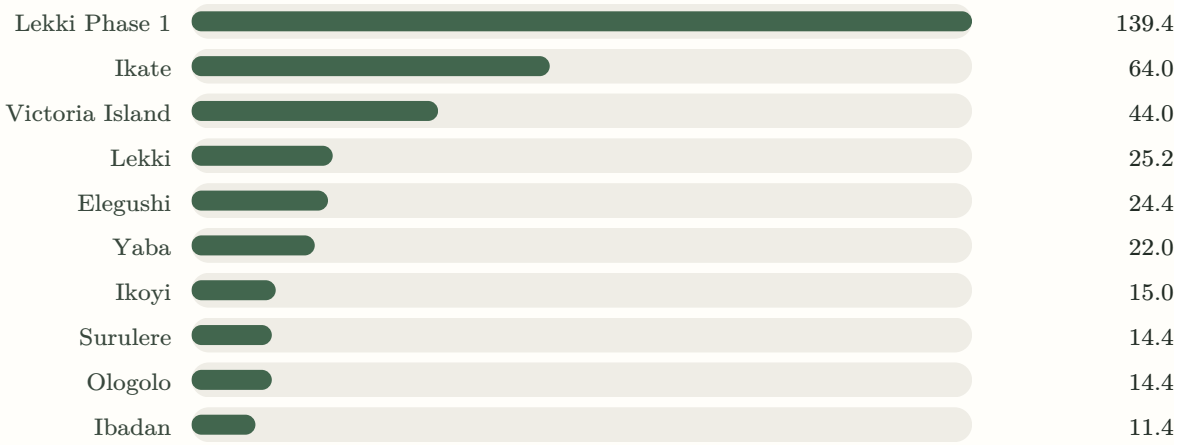

## 02 Inventory Distribution — Most Active Areas

The PS-0 PropertyScraper lens reveals a highly concentrated distribution of sales inventory, heavily weighted towards Lagos and Abuja. Lagos dominated the landscape with 27,447 active listings across 131 neighbourhoods, while Abuja followed with 3,842 active listings across 66 neighbourhoods. Lekki and Lekki Phase 1 led individual neighbourhood activity, averaging 42.6 and 41.0 active listings per week respectively, followed closely by Ikota at 34.9. This concentration highlights where developer activity and secondary market listings are most liquid, contrasting sharply with secondary markets like Kano, which recorded just 10 active listings.

# 03 Pricing Tiers — Expensive & Affordable

Pricing structures reveal a stark divergence between ultra-luxury enclaves and affordable peripheral markets. Banana Island remains the absolute ceiling of the market, posting an average weekly median price of ₦4,621.5M with an average days on market (DOM) of 3.1 days, followed by Ikoyi at ₦3,325.3M (DOM: 3.0 days). Conversely, the affordable segment is led by Ilupeju at ₦1.5M (DOM: 33.0 days) and Ohaji at ₦4.5M (DOM: 1.0 day). The extremely low days on market for ultra-luxury properties suggests that high-value listings are either highly sought after or represent highly motivated, pre-negotiated transactions captured rapidly by the platform.

## MOST EXPENSIVE AREAS

## 04 Regional Performance Deep Dive

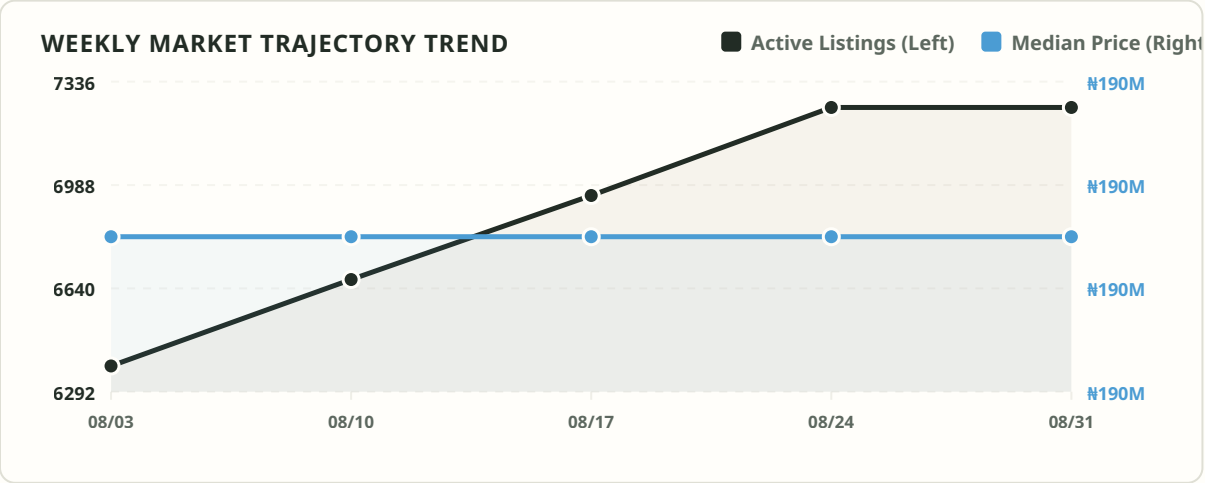

Lagos remains the primary engine of the online residential sales market, accounting for 27,447 active listings and 861 new listings across 131 neighbourhoods. The market maintained a median listing price of ₦200.0M, supported by high-volume activity in the Lekki-Ajah corridor. The city also accounted for the vast majority of market adjustments, recording 53 of the 68 total price reductions, indicating that while demand remains concentrated here, some sellers are having to recalibrate expectations to secure liquidity. Abuja's sales market presents a premium profile, with a median listing price of ₦220.0M across 66 neighbourhoods, surpassing the Lagos median. The territory maintained 3,842 active listings and added 133 new listings, led by Katampe. Luxury enclaves like Guzape (₦951.7M, DOM: 3.1 days) and Asokoro (₦868.8M, DOM: 7.5 days) continue to drive the high-end segment, while price reductions remained minimal at just 6 events, reflecting strong seller holding power in the capital. Outside the two primary hubs, Ibadan emerged as a notable secondary market with 1,396 active listings and a median price of ₦95.0M, driven by its namesake neighbourhood. Port Harcourt displayed a higher-value profile with a median price of ₦147.5M across 400 active listings, while Enugu posted a median of ₦170.0M. In contrast, Ogun State offered a more affordable alternative with a median price of ₦15.0M across 771 active listings, and Imo State recorded the lowest median price among active states at ₦12.2M.

## 06 Price Reduction Analysis

The 68 price reduction events recorded in August represent a minor fraction of the 34,500 cumulative active listings, signaling strong seller resistance to downward price adjustments. The peak of 21 reductions occurred in the week of 2026-08-03, tapering down to just 3 by the final week. With Lagos accounting for 53 of these reductions, price flexibility is almost exclusively a Lagos phenomenon, suggesting that sellers in other regions prefer to let listings sit rather than discount.

**Peak reduction week:** 2026-08-03 with 21 events.

## 07 Market Outlook

The 13.6% growth in active listings combined with a flat median price of ₦190.0M suggests that the sales market is entering a phase of inventory accumulation without immediate downward pressure on pricing. If new listing inflows resume after the late-August pause, and price reductions remain low, we expect days on market to lengthen in secondary locations while prime Lagos and Abuja assets maintain their pricing premium due to sustained capital preservation demand.

# Rentals Market Analysis

| PEAK ACTIVE LISTINGS | NEW LISTINGS | PRICE REDUCTIONS | INVENTORY GROWTH | NEIGHBOURHOODS TRACKED |
|---|---|---|---|---|
| 6,336 | 1,199 | 82 | 16.2% | 183 |
| Latest week total | Discovered this period | Seller adjustments tracked | First → last week | Across 6 cities |

## 01 Executive Summary

The residential rental market in August 2026 experienced a significant expansion in online listings, with cumulative active listings reaching 29,903 across 183 unique neighbourhoods. Active rental listings grew by 16.2% over the month, rising from 5,452 in the first week to a peak of 6,336 in the final two weeks. Despite this steady influx of inventory, the national median rental price remained remarkably stable at ₦7.0M/yr across all five weeks.

### Key Takeaways

→ Active rental listings increased by 16.2% over the month, peaking at 6,336.

→ The national median rental price remained stable at ₦7.0M/yr.

→ Banana Island recorded the highest median rent at ₦54.7M/yr.

→ Lagos accounted for 85% of all price reductions in the rental market.

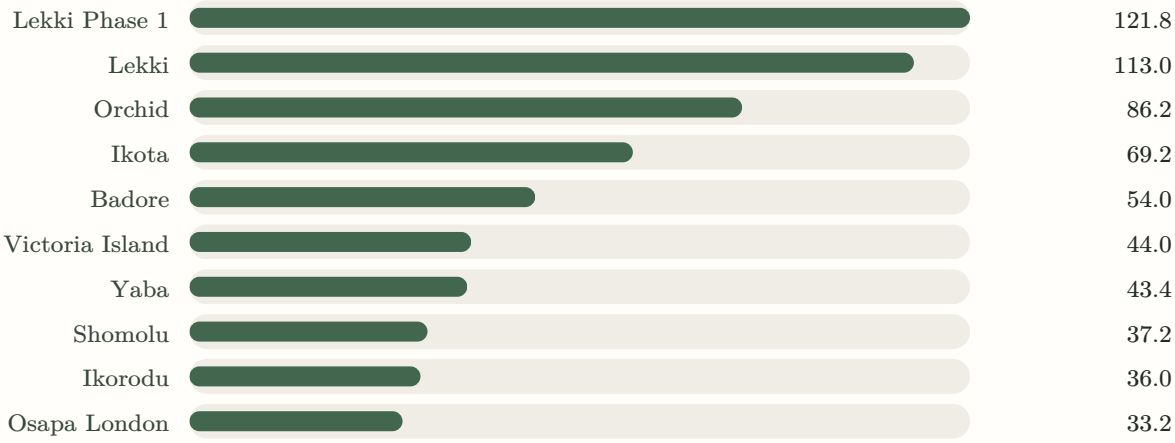

→ High-end rentals in Victoria Island and Ikoyi average under 3.5 days on market.

**Data Scope & Scraper Limitations:** This report represents observations collected solely through the PS-0 PropertyScraper pipeline from advertised online listings. It should be understood as a specific digital lens on advertised prices and online inventory, not as an absolute, exhaustive generalisation of the entire physical real estate market across Nigeria.

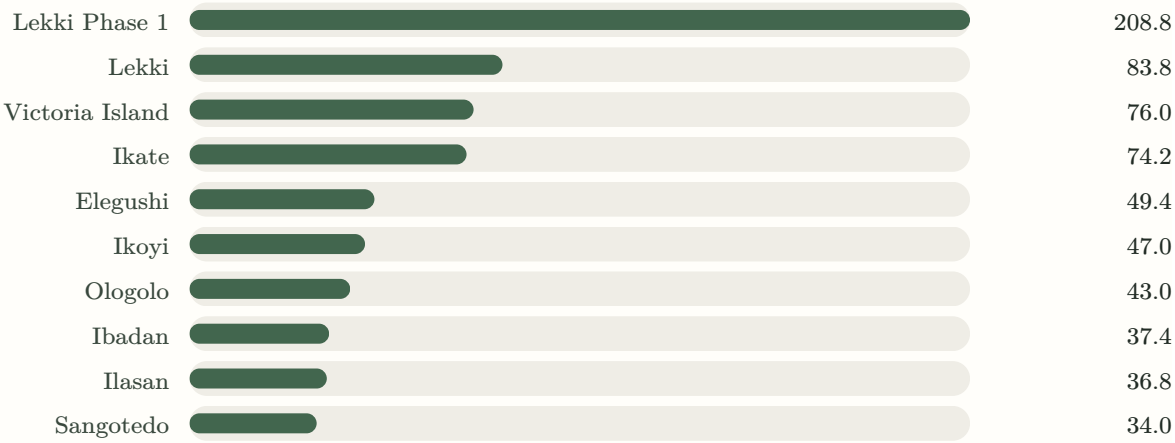

## 02 Inventory Distribution — Most Active Areas

Rental inventory is heavily concentrated in Lagos, which accounted for 25,955 active listings across 125 neighbourhoods, representing the vast majority of the national rental pool. Abuja followed with 2,902 active listings across 49 neighbourhoods. Lekki Phase 1 and Lekki led individual neighbourhood rental activity, averaging 56.5 and 43.0 active listings per week respectively, reflecting the high density of modern, tenant-targeted developments along the Lekki peninsula.

## 03 Pricing Tiers — Expensive & Affordable

The rental pricing spectrum highlights an extreme premium for secure, high-end enclaves. Banana Island represents the absolute peak of the rental market with an average weekly median rent of ₦54.7M/yr (DOM: 3.0 days), closely followed by Victoria Island at ₦50.2M/yr (DOM: 2.2 days)

and Ikoyi at ₦50.1M/yr (DOM: 3.4 days). On the affordable end, mainland Lagos locations like Bariga and Mushin offer entry-level pricing at ₦1.0M/yr, both showing a rapid turnaround with a 1.0-day average days on market.

## 04 Regional Performance Deep Dive

Lagos remains the dominant rental market, hosting 25,955 active listings and generating 1,044 new listings over the month. The city-wide median rental price stood at ₦7.0M/yr, heavily influenced by high-volume, mid-to-high-tier listings in Lekki Phase 1, Ikoyi, and Victoria Island. Lagos also saw the highest volume of landlord adjustments, accounting for 70 of the 82 total rental price reductions, as some landlords adjusted pricing to avoid prolonged vacancies. Abuja's rental market commands a premium over Lagos, with a median rental price of ₦9.0M/yr across 49 neighbourhoods. The capital maintained 2,902 active listings and added 121 new listings, with Jahi emerging as the top rental neighbourhood. High-end demand was concentrated in Maitama (₦34.4M/yr, DOM: 2.5 days) and Guzape (₦18.4M/yr, DOM: 2.1 days), while price reductions remained low at just 9 events, indicating strong rental demand and landlord resilience. Outside the two main hubs, Port Harcourt recorded a high median rental price of ₦13.5M/yr across 60 active listings, reflecting a premium niche market. Ibadan offered a substantial secondary rental market with 838 active listings and a median rent of ₦3.2M/yr, while Ogun State provided a highly affordable alternative with a median rent of ₦1.6M/yr across 108 active listings. Enugu recorded a small rental footprint of 40 active listings with a median rent of ₦2.0M/yr.

| City / State | Neighbourhoods | Cumulative Active | New Listings | Price Reductions | Median Price (NGN) | Top Active Area |

## 06 Price Reduction Analysis

Landlords executed 82 price reductions during the month, with a significant peak of 35 reductions in the first week (2026-08-03) before declining to zero by the final week. Lagos accounted for 70 of these reductions, indicating that rental price flexibility is largely confined to the highly competitive Lagos market, where landlords are more sensitive to vacancy costs.

**Peak reduction week:** 2026-08-03 with 35 events.

## 07 Market Outlook

With rental inventory growing by 16.2% and median rents holding firm at ₦7.0M/yr, the rental market is showing signs of landlord resilience. However, the concentration of price reductions in Lagos suggests that high-end landlords may face pressure to offer concessions or minor rent reductions in the coming months if the inventory of active listings continues to climb without a corresponding surge in tenant absorption.

## 08 Methodology & Data Notes

**Data source:** PS-0 PropertyScraper autonomously collects listings from PropertyPro.ng, PrivateProperty.com.ng, and NigeriaPropertyCentre.com on a weekly discovery cadence with mid-week health checks.

**Neighbourhood normalisation:** Raw neighbourhood strings from all portals are normalised to a canonical name via a manually-curated mapping table. Only neighbourhoods with ≥90% normalisation coverage are included in analysis.

**Price storage:** All prices are stored internally as 64-bit integer kobo values to eliminate floating-point arithmetic errors. NGN figures displayed in this report are exact integer divisions by 100.

**Median vs. mean pricing:** Median is used throughout to reduce skew from outlier luxury listings. P25, P75, and P90 data are available in the source dataset but excluded from this summary report for brevity.

**Price reductions:** An event is recorded when a listing's price decreases between two consecutive observations. Multiple reductions on the same listing count as separate events.

**Days on market (DOM):** Computed as the number of days between a listing's first observed date and the snapshot date. Listings present since before the pipeline's inception show DOM from the first observation date, not the actual listing date.

**Outage handling:** On weeks where portal access was blocked or failed, active inventory is carried forward from the prior week. New listing counts are recorded as zero for that week. These weeks are noted in the weekly table.
