PEAK ACTIVE LISTINGS 12,131 Latest week total	NEW LISTINGS 3,752 Discovered this period	PRICE REDUCTIONS 263 Seller adjustments tracked
INVENTORY GROWTH 23.0% First → last week	NEIGHBOURHOODS TRACKED 194 Across 8 cities	

The Nigerian residential property market demonstrated notable expansion in June 2026, with active listings growing by 23.0% from 9,864 in the first week to a peak of 12,131 in the final week. Across the 194 unique neighbourhoods analysed, cumulative active listings reached 43,648, supported by the discovery of 3,752 new listings. This supply injection reflects heightened developer activity and a concerted push to bring inventory to market before the mid-year close.

Pricing dynamics remained volatile but consolidated towards a median of ₦15.0M by the final week of June, down from a mid-month peak of ₦17.2M. This fluctuation was accompanied by 263 price reduction events, peaking at 78 in the week of 8 June 2026. The high volume of price adjustments, particularly in Lagos, suggests a tactical recalibration by sellers to stimulate absorption amid rising inventory levels.

Regional performance highlights a stark divergence between primary commercial hubs and secondary markets. While Lagos continues to dominate transaction volumes with 115 active neighbourhoods, premium enclaves in Enugu and Port Harcourt recorded high median prices of ₦175.0M and ₦120.0M respectively, albeit on highly concentrated listing volumes. Abuja maintained a stable secondary position with 48 active neighbourhoods and a median price of ₦30.0M.

Key Takeaways

- Active listings grew by 23.0% over the four-week period, peaking at 12,131 properties in the final week.
- Lagos dominated market activity, accounting for 115 neighbourhoods and 222 of the 263 total price reduction events.
- Apapa and Pinnock Beach Estate established the luxury ceiling with median prices of ₦1,300.0M and ₦1,000.0M respectively.
- Enugu and Port Harcourt recorded high median prices of ₦175.0M and ₦120.0M, indicating strong premium pricing in secondary hubs.
- A total of 263 price reduction events, peaking in early June, signals rising seller capitulation to maintain transaction velocity.

02

Inventory Distribution — Most Active Markets

Inventory distribution remains heavily concentrated in Lagos, which accounts for 115 of the 194 unique neighbourhoods tracked. The weekly active listing volume expanded steadily from 9,864 to 12,131, representing a 23.0% expansion over the four-week period. This growth was driven by a strong influx of 3,752 new listings, with notable weekly spikes of 1,268 and 1,361 new properties in the first and fourth weeks respectively. The concentration of active listings is highly localised, with Lekki Phase 1 leading activity with an average of 1434.0 active listings per week, followed by Lekki at 816.2 and Victoria Island at 617.5. This clustering in the Lekki-Ajah corridor and premium Lagos Island nodes signals a sustained developer focus on high-density residential developments, which may lead to localised oversupply if absorption rates do not match the 23.0% inventory growth rate.

#	NEIGHBOURHOOD	CITY / STATE	AVG. WEEKLY ACTIVE LISTINGS
1	Lekki Phase 1	LAGOS	1,434.0
2	Lekki	LAGOS	816.2
3	Victoria Island	LAGOS	617.5
4	Ikoyi	LAGOS	617.0
5	Ikate	LAGOS	468.2
6	Ikota	LAGOS	421.8
7	Ikeja	LAGOS	345.2
8	Orchid	LAGOS	298.0
9	Elegushi	LAGOS	236.5
10	Banana Island	LAGOS	229.2

Average computed across all snapshot weeks in the reporting period. Neighbourhoods with fewer than 10 average weekly listings are excluded from pricing tables.

The market exhibits a wide pricing spectrum, with the luxury ceiling established by Apapa at a median price of ₦1,300.0M and Pinnock Beach Estate at ₦1,000.0M, showing average days on market (DOM) of 44.0 and 41.5 days respectively. Other premium nodes such as Omole Phase 2 (₦650.0M) and Omole Phase 1 (₦488.5M) continue to command high valuations, though Royal Garden Estate recorded the fastest turnaround among high-end locations with a DOM of 16.9 days at a median price of ₦485.0M. Conversely, the affordable end of the spectrum is characterised by micro-unit listings and rental-dominated data points, with Eko Atlantic and Wuse recording low median entries of ₦448k and ₦656k respectively, reflecting short-term lease or fractional investment listings. Established mainland residential areas like Mushin (₦1,000k), Onipanu (₦1,200k), and Ilupeju (₦1,200k) represent the entry-level threshold for low-cost residential options, maintaining average days on market between 33.1 and 41.2 days.

Most Expensive Areas

#	NEIGHBOURHOOD	AVG. MEDIAN PRICE	AVG. DOM
1	Apapa LAGOS	₦1.30B	44.0d
2	Pinnock Beach Estate LAGOS	₦1000.0M	41.5d
3	Omole Phase 2 LAGOS	₦650.0M	35.2d
4	Omole Phase 1 LAGOS	₦488.5M	38.0d
5	Royal Garden Estate LAGOS	₦485.0M	16.9d
6	Nicon Town LAGOS	₦373.8M	37.5d
7	Amuwo Odofin LAGOS	₦286.2M	20.8d
8	Guzape ABUJA	₦270.0M	32.3d
9	Ojodu Berger LAGOS	₦268.8M	39.5d
10	Kado ABUJA	₦241.2M	34.2d

Most Affordable Areas

#	NEIGHBOURHOOD	AVG. MEDIAN PRICE	AVG. DOM
1	Eko Atlantic LAGOS	₦448k	40.8d
2	Wuse ABUJA	₦656k	32.5d
3	Mushin LAGOS	₦1.0M	33.1d
4	Onipanu LAGOS	₦1.2M	39.2d
5	Ilupeju LAGOS	₦1.2M	41.2d
6	Kosofe LAGOS	₦1.6M	38.1d
7	Badore LAGOS	₦1.8M	28.2d
8	Seaside Estate LAGOS	₦1.8M	18.9d
9	Lagos Business School LAGOS	₦2.0M	40.8d
10	Shomolu LAGOS	₦2.0M	30.8d

Lagos

Lagos remains the undisputed anchor of the national residential market, containing 115 active neighbourhoods and posting a median price of ₦15.0M. The state's activity is heavily concentrated in Lekki Phase 1, which averaged 1434.0 active listings per week, alongside premium nodes like Victoria Island (617.5) and Ikoyi (617.0). The market's depth is further evidenced by its dominance in price corrections, accounting for 222 of the 263 total price reduction events, indicating that Lagos sellers are highly sensitive to liquidity constraints and actively adjusting expectations to clear stock.

NEIGHBOURHOODS	TOP AREA	MEDIAN PRICE
115	Lekki Phase 1	₦15.0M

Abuja (FCT)

Abuja represents the second-largest market by footprint, spanning 48 active neighbourhoods with Katampe emerging as the top area and the territory maintaining a median price of ₦30.0M. Premium demand is concentrated in Guzape and Kado, which posted high median prices of ₦270.0M (DOM of 32.3 days) and ₦241.2M (DOM of 34.2 days) respectively. The capital territory recorded 29 price reduction events, reflecting a relatively stable pricing environment compared to Lagos, supported by steady institutional demand.

NEIGHBOURHOODS	TOP AREA	MEDIAN PRICE
48	Katampe	₦30.0M

Other Cities (Ibadan, Enugu, Port Harcourt, Edo, Ogun, Imo)

Beyond the two primary hubs, secondary markets showed highly concentrated, high-value activity. Enugu led these secondary markets with a median price of ₦175.0M across 2 neighbourhoods, followed by Port Harcourt at ₦120.0M across 2 neighbourhoods, reflecting premium, low-volume listings. Edo (5 neighbourhoods) and Ibadan (5 neighbourhoods) recorded median prices of ₦72.5M and ₦20.0M respectively, while Ogun (15 neighbourhoods) and Imo (3 neighbourhoods) represented more affordable entry points with medians of ₦7.4M and ₦4.6M.

Week Start	Active Listings	New Listings	Price Reductions	Median Price (NGN)
2026-06-01	9,864	1,268	54	₦15.0M
2026-06-08	10,881	1,123	78	₦17.0M
2026-06-15	10,772	0	71	₦17.2M
2026-06-22	12,131	1,361	60	₦15.0M

The occurrence of 263 price reduction events across the four-week period serves as a critical indicator of market resistance and seller capitulation. This trend peaked during the week of 8 June 2026 with 78 reductions, coinciding with a rise in active listings to 10,881. The overwhelming concentration of these reductions in Lagos (222 events) compared to Abuja (29 events) and other cities highlights a highly competitive environment where developers are forced to discount prices to maintain transaction velocity in the face of a 23.0% expansion in active inventory.

Peak reduction week: 2026-06-08 with 78 events.

Looking ahead, the 23.0% growth in active listings to a peak of 12,131 in the final week of June suggests that supply will continue to outpace demand in the near term, keeping downward pressure on median prices. The stabilisation of the median price at ₦15.0M, coupled with persistent price reductions, indicates that the market is transitioning into a buyer's market, particularly in high-density corridors like Lekki. Developers will likely focus on optimising days on market, which currently averages 30 to 44 days in premium areas, by offering flexible payment structures rather than outright price cuts.

Data source: PS-0 PropertyScraper autonomously collects listings from PropertyPro.ng, PrivateProperty.com.ng, and NigeriaPropertyCentre.com on a weekly discovery cadence with mid-week health checks.

Neighbourhood normalisation: Raw neighbourhood strings from all portals are normalised to a canonical name via a manually-curated mapping table. Only neighbourhoods with $\geq 90\%$ normalisation coverage are included in analysis.

Price storage: All prices are stored internally as 64-bit integer kobo values to eliminate floating-point arithmetic errors. NGN figures displayed in this report are exact integer divisions by 100.

Median vs. mean pricing: Median is used throughout to reduce skew from outlier ultra-luxury listings. P25, P75, and P90 data are available in the source dataset but excluded from this summary report for brevity.

Price reductions: An event is recorded when a listing's price decreases between two consecutive observations. Multiple reductions on the same listing count as separate events.

Days on market (DOM): Computed as the number of days between a listing's first observed date and the snapshot date. Listings present since before the pipeline's inception show DOM from the first observation date, not the actual listing date.

Outage handling: On weeks where portal access was blocked or failed, active inventory is carried forward from the prior week. New listing counts are recorded as zero for that week. These weeks are noted in the weekly table.
